

Air Skid Rigging Kit

The Airfloat Rigging Kit is designed for riggers needing to transport an air skid set from job site to job site. Containing everything needed to operate the unit in a Knack box, including spare parts, the Rigging Kit has enough power to float up to 52,500 lbs. on air.

Easy To Use Simply remove the air skids from the box and position them, connect the air lines to the flow controller, turn on the air, and let the Air Casters do the heavy lifting.

More Powerful Operating at near friction-free, air casters make it possible to move 1,000 lbs. with only 1 lb. of force. That’s 10 X more powerful than wheels or rollers.

Model	Model #	Capacity (lbs)	Air Pressure (psi)	Air Flow (scfm)	Height (in)	Lift (in)
12" Air Skid Rigging Kit	C18-0006	18,000	90	44	3	0.25
17" Air Skid Rigging Kit	C18-0007	37,500	90	64	3	0.375
20" Air Skid Rigging Kit	C18-0008	52,500	90	72	3	0.375

“DESIGNED SPECIFICALLY WITH PROFESSIONAL RIGGER’S IN MIND, THE RIGGING KIT CONTAINS EVERYTHING NEEDED TO OPERATE AN AIR SKID SET HOUSED IN A LOCKABLE STEEL BOX THAT CAN BE EASILY TRANSPORTED BETWEEN JOB SITES.”
